

April 2011

N520GK

This helicopter was originally put into service by the Phoenix Police Department in 2002, it has a 2002 data plate.

Vortex Helicopters bought it in 2006. We repainted it with red metallic and black with clear coat. We replaced the interior with a completely new one, rebuilt the panel from scratch. We installed a new Garmin GNS480 and MX 20 moving map. This helicopter is fitted out very sweet.

It runs great and the engine has the R++ mod. It typically does a power check on the 20 degrees cool side. It has a hook but we have never done any external loads.

We have used it for aerial filming rarely has anyone even sat in the back seat.
